

EAST *of* WESTERN

OUR SERVICES

Website Design

We work with you to create a custom front-end design for your website. Our design process includes creating 1-2 design concepts for the site and then working with you for 1-2 rounds of revisions to finalize the site layout. The East of Western system can also work with your existing website design.*

.....

Website Development

During the design process we will install the East of Western (EOW) Content Management System on your server so you can begin to upload and organize your content.

Once the site is coded and launched you will have full control over the content of your website, including images, text, videos and pages of the site. We can show you an online demo of the system if you would like more details.

Our development process includes:

- Installing the EOW system on your server. If you don't have a current hosting provider we can recommend a provider for you.
- Custom coding to create the front-end of your website
- Optimization of your website for all major Search Engines and Directories (SEO)
- Quality Assurance (QA) Testing across all major browsers and computer systems.
- Mobile site development so your site will work on mobile platforms including iPad and iPhone.
